

Portable tool kits

Customized and solid design

Solid design and material secure stable and durable tool kits in suitcases. Each tool has their individual place in the custom shaped foam inside the suitcases, making it easy to locate the tools needed and at the same time providing a fast overview of all tools.

The most important job for the crew is to do the service or installation task safe and correct. Providing the crew with customized tool kits tailored to the service or installation task in question, makes it easy to keep track of tools and minimize time spend on locating tools.

With the customized tool kits you lower the risk of wasting tools, as it is fast and easy for the crew to locate if any tools are missing.

Advantages:

- Easy to transport
- Tailored to the service or installation task in question – only needed tools are included
- Lowering risk of wasting tools
- Fast and easy overview
- Solid suitcase for harsh environment.
